

PAC Key Chart

NOTE: This chart is for US vehicles only.

NOTE: Please identify which SmartKey is specified for vehicle and if different from customer's original key a new mechanical blade may need to be ordered.

NOTE: After first eight SmartKeys have been issued, dealer must specify duplicate track desired by indicating "DUP#_" in turnaround field of order.

NOTE: MAYBACH, SLR & SLS SMARTKEYS PLEASE REFER TO EPC

PAC Key Chart

If spare / duplicate keys are requested, the below chart can be used for reference.

Key Track	Segment 1 (Additional Key)	Segment 2 (Spare Key)	Segment 3 (Spare Key)
1	Standard	DUP12	DUP13
2	Standard	DUP22	DUP23
3	0041	DUP32	DUP33
4	0041	DUP42	DUP43
5	0041	DUP52	DUP53
6	0041	DUP62	DUP63
7	0041	DUP72	DUP73
8	0041	DUP82	DUP83

Additional Key – This is an electronic key that is ordered in addition to the existing keys. This key is not replacing another key.

Spare Key – This is an electronic key that replaces a lost, stolen, or inoperative key on the same key track. Before you order a replacement key, the key to be replaced must first be identified. This must be done by the technician using the Xentry Diagnostic system. Order this key with the appropriate track/segment information from the table below once the correct key track/segment is identified.

Examples of Spare Key Dups:

Vehicle w/ 889- **A231 905 07 39 0041** with **DUP12** in turnaround info for Track 1 Dup 2.

Vehicle w/o 889- **A231 905 46 00 0041** with **DUP23** in turnaround info for Track 2 Dup 3

Ability to stock blank keys and all key coding (electronic keys) will be conveniently managed via an internet connection using the Xentry Diagnostic system at your dealership. Note that extended DAS4 Xentry Flash user rights are required for this process and can only be obtained after dealer technician completes a 1-day instructor led training course.

Dealers who do not have a technician successfully pass the training will not be able to code their own keys. For those cases, and as a back-up, MBUSA's Key and Lock Center will continue to take orders as described above.

Mechanical Keys & Remotes for Older Vehicles

163 M Class

A163 760 19 06 Remote with Blade

A163 760 14 06 Coding Key for AAM 1998-99 only

A163 760 08 06 Valet key

A210 766 02 06 Blade Only, for Remote

NOTE: 1998-99 M Class have a limit of 8 keys total, existing keys cannot be duplicated. After all 8 keys are used, order a new lock set, ME-SFI control module and AAM, all coded to the new lockset code. 2000 and up, Duplicates may be ordered. (Lock set comes with 2 remotes and a coding key.)
