

Please note: changes may have been made to the products since this brochure went to press (31.08.2008). The manufacturer reserves the right to make changes to the design, form, colour and specification during the delivery period, provided these changes, while taking into account the interests of the vendor, can be deemed reasonable with respect to the purchaser. Where the vendor or the manufacturer uses symbols or numbers to describe an order or the subject of an order, no rights may be derived solely from these. The illustrations may show accessories and items of optional equipment which are not part of standard specification. Colours may differ slightly from those shown in the brochure, owing to the limitations of the printing process. This brochure has been compiled by Daimler AG of Germany and is distributed internationally. It provides a general indication of the range of models, features, optional extras and/or colours available in various countries. Some of the models, features, optional extras and/or colours may not be available in your country or may only be available in a different specification. Additionally some models, features, optional extras and/or colours may only be available in combination with others. For current and more specific information in relation to the range of models, features, optional extras and/or colours available in your country, and their pricing, you should contact your nearest authorised Mercedes-Benz Passenger Car Dealer.

Mercedes-Benz light-alloy wheels

It's never been easier to give your Mercedes-Benz an even more dynamic, elegant or sporty look – because few components have such a dramatic effect on a car's appearance as its wheels.

Discover the full range of Mercedes-Benz and AMG light-alloy wheels for all current car models. This brochure offers you a wealth of options when it comes to tailoring your Mercedes-Benz to your own unmistakable style – whether elegant or sporty, striking or dynamic.

Affinity

A Mercedes-Benz light-alloy wheel is developed using the same high-end tools as the vehicle itself. Little wonder, then, that it meets the same quality standards

What our wheel tables tell you:

20	TOMEKO	Wheel size in inches WHEEL NAME
	10-spoke wheel	Product name
	8.5 J x 20 ET 56 · 265/45 R20	Wheel size · Tyre size
	B6 647 4528	Order number
	Two-tone finish (black/high-sheen); not compatible with snow chains	Additional information

A word of advice: because of differences in national regulations, various different versions of each vehicle exist. Please also bear in mind that vehicle development is permanently ongoing. As a result, not all of the wheel/tyre combinations shown in this brochure will be approved for your particular Mercedes-Benz. Your Mercedes-Benz dealer, however, has access to constantly updated information on every Mercedes-Benz wheel, including the relevant technical inspection findings and licensing conditions, and will be happy to advise you.

With low-profile tyres, wheels, tyres and parts of the suspension are subject to higher loads and are generally, therefore, more susceptible to damage, e.g. from uneven road surfaces.

How we reinvented the wheel

With every gram saved, the engineers move a step closer to the ideal wheel. Using state-of-the-art 3D computers they devise test parts and subject them to intensive trials.

The targets are absolute true running, high thermal conduction, optimum brake ventilation – and of course top quality.

Inner and outer values

The thrilling design of the star-branded wheels builds on the design idiom of the vehicles themselves.

Assert your own distinctive style. With Mercedes-Benz light-alloy wheels

Acid test

On test rigs, on racetracks and in long-term on-road use every design has to prove that it can cope with many times the prescribed load

incenio DESIGNER WHEELS FROM MERCEDES-BENZ

▼ Important information regarding 17" and 18" tyres:

With basic suspension and/or Code 485 (comfort suspension); Code 494 (USA suspension); Code 482 (increased ground clearance) only permissible with following modification: standard spring buffer on front axle must be replaced with rubber stop, part no. A211 326 0268 (B6 647 0005).

With AVANTGARDE suspension Code 954 only permissible without Code 485 (comfort suspension), modification required: standard spring buffer on front axle must be replaced with rubber stop, part no. A211 323 0244.

With AIRMATIC suspension (Code 489) or sports suspension (Code 486) or sports package (Code 952/950) no modifications required.

Changes for facelift from 06/06:

17" and 18" tyres are approved and certified without modifications for vehicles with Code 954 (AVANTGARDE) from the facelift. Exception: the combination of Code 954 (AVANTGARDE) and Code 485 (comfort suspension).

Here modifications as per basic suspension are required.

Change from MY0808:

17" or 18" tyres also permissible for E200 CDI, E220 CDI with Code U24 or Code 950/952 (includes Code U24).

A dazzling range of looks

Sterling silver

Titanium silver

Depending on the style, once the top-quality aluminium wheel has been cast, it is given a high-sheen, ball-burnished finish and a multi-coat paint application. The coating not only provides a shiny look, but also optimum protection against corrosion, ensuring long product life.

So, as you see, there's silver and there's silver. And the most beautiful shades have a star attached.

Two-tone

Chrome shadow

At the centre of it all: the hub caps. Four versions are available

- 1 | Classic Roadster design in blue; B6 647 0120*
- 2 | Classic Roadster design in black; B6 647 0201*
- 3 | Sterling silver with chrome star; B6 647 0206*
- 4 | Titanium silver with chrome star; B6 647 0203*

Added value: wheel bolts, rim locks and valve caps - ask your Mercedes-Benz dealer for practical accessories.

Please note: light-alloy wheels are supplied without tyres, wheel bolts or hub caps.

The pressure's on: tyre pressure gauge which can store readings. Suitable for all tyre valves. Keeping tyres at the optimum pressure saves fuel and reduces tyre wear.

Dream combinations at the click of a mouse

The Mercedes-Benz Wheel Configurator features Mercedes-Benz's entire range of **incenio** designer wheels and light-alloy wheels. From the comfort of your PC, select your Mercedes-Benz model in the appropriate paintwork colour and see how it looks with your choice of wheels – all at the click of a mouse.

Visit us at www.mb-configurator.net

Please note: exclusive wheel design from Mercedes-Benz and AMG is not just available for current model series; it's also available for many previous car models. Let yourself be inspired: your Mercedes-Benz dealer will be happy to provide you with a copy of the special brochure shown here.
