Vehicle Inspection Report (VIR)

TSI PASS

Congratulations! Your vehicle passed the inspection and maintenance test. Vehicle emissions are one of the largest contributors to air pollution in the Treasure Valley. By keeping your vehicle well maintained, you are helping to keep harmful pollutants out of the air we breathe. Thank you for doing your part!

Next Test Date:

Many people in the Treasure Valley are affected by high levels of air pollution, particularly ozone and particulate matter. Those with heart and lung disease, the very young, and the elderly are especially sensitive. In the Treasure Valley motor vehicles are the largest sources of carbon monoxide (CO) and nitrogen oxides (NOx) and the second highest of hydrocarbons (HC) also known as volatile organic compounds (VOCs). These pollutants contribute to the formation of ozone and particulate matter in the atmosphere. To further reduce your vehicle's impact on air quality, please consider driving less, keeping your vehicle maintained, not topping off your gas tank, complying with air quality advisories, and don't burn waste. Visit the DEQ website (www.deq.idaho.gov) or simply scan the QR code for additional information on Treasure Valley air quality. Working together, we can treasure the valley's air and all breathe a little easier!
