D18	WF58.50-P-1840-01A	Oil filter cap with connection hole for measuring oil pressure	Engine 604, 605, 606	 WF
------------	--------------------	--	----------------------	---

For connecting an oil pressure gauge.

Drill a connection hole with thread at a replacement oil filter cap to enable the connection fitting of the oil pressure gauge to be screwed in.

Diameter of thread M12×1.5.

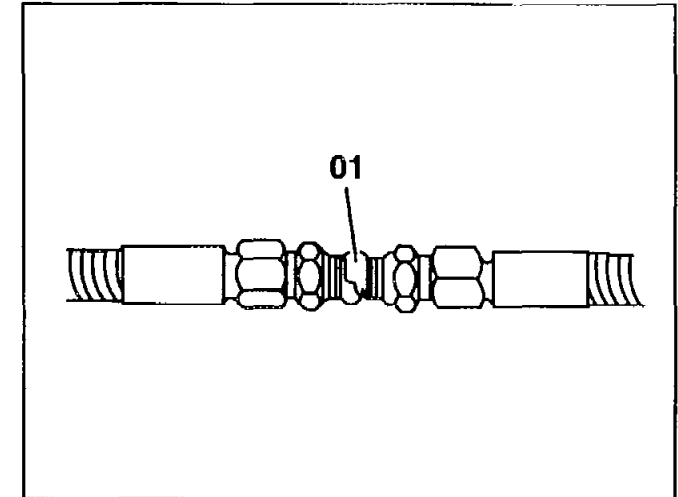

P58.50-0200-01

E18	WF58.50-P-2020-01A	Connection fitting for automatic transmission fluid pipes	All engines	 WF
------------	--------------------	---	-------------	---

Shop-make double threaded union (01) for short-circuiting ATF feed and return pipes, e.g. from DIN parts.

Diameter of thread M14×1.5.

P20.30-0004-01

F18	WF58.50-P-0110-01A	Guard plate for radiator/condenser		 WF
------------	--------------------	------------------------------------	--	---

Shop-make guard plate from sheet metal or plastic with the approximate dimensions 400 x 680 x 1 mm.

Attach appropriate retaining bar to the plate for attaching it to radiator of condenser.
