

MOTRONIC ENGINES.
A new 400hp version of AMG's 4-cam, 32-valve motor featuring the Bosch Motronic engine management system is expected to be available mid-year 1988. This is the same type of fuel metering and ignition timing management system employed in Formula 1 racing. Special update packages will be available for existing 4-cam, 32-valve motors.

3-PIECE MODULAR WHEELS.
Light-weight 3-piece modular wheels will also be available for a variety of applications, including this 10 x 17 version for wide body equipped SEC's or CE's.
