- 1) The pitman arm forms a unit together with the steering gear and is therefore not available as a part.
- 2) Modified steering geometry as of 1.6.89. The taper in the pitman arm and steering idler arm was enlarged by 2 mm.
- 3) Installation of steering gear 765.904 is feasible.
- 4) Installation of steering gear 765.928 is feasible.

- 1) up to chassis end no. A084 024 (with clamping bush)
- 2) as of chassis end no. A084 025 (without clamping bush)
- 3) The pitman arm forms a unit together with the steering gear and is therefore not available as a replacement part.
- 4) Steering gear with aluminum housing up to 5/91
- 5) Japan only with aluminum housing
- 6) Steering gear with nodular graphite iron housing phased in as of approx. 5/91, previously aluminum housing.
