

AMG

THE AMG MERCEDES

Dream cars are allowed to be
inconspicuous – if they have enough power

An E 60 AMG is not always recognisable at first glance. And that is exactly the point. But the driver will undoubtedly recognise it at the first touch on the accelerator. This Mercedes reacts with the finest kind of power. That, too, was our intention when we created an eight-cylinder engine with a six-litre displacement.

The torque curve confirms the six-litre, eight-cylinder engine of the E 60 AMG as an extremely powerful piece of machinery. The bare facts, maximum output 280 kW (381 hp) at 5500/min, maximum torque 580 Nm at 3750/min. Its real strength is that between 1750/min and 5400/min, the torque is over the dream mark of 500 Nm.

Wheels from AMG are not only optionally available for your new Mercedes, but also form part of the range of accessories for everyone who has stayed young enough to wear something sporty.

C-CLASS

Cast 15 inch code 790

including MB sports suspension

Rims: 7 J x 15 ET 37

Tyres: 205/60 R 15 V

Cast 17 inch code 798

including MB sports suspension

Rims: 7.5 J x 17 ET 35

Tyres: 225/45 ZR 17

E-CLASS
