Modification notes

28.9.99	Replaces SI 20/50 of 08.03.94	Please remove SI 20/50 from your file.	
---------	-------------------------------	--	--

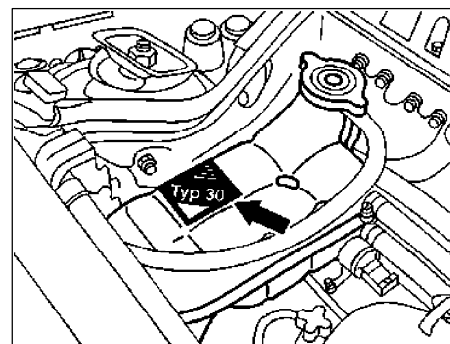

A special corrosion protection/antifreeze agent (KFM) type 30 is available for "aluminum corrosion in cooling circuit".

Mixture

- 50 Vol. % water
- 50 Vol. % corrosion/antifreeze agent provides frost protection up to -37°C

ⓘ Fit warning sticker clearly visible on the expansion tank (see arrow)

ⓘ KFM type 30 must not be mixed with any other antifreeze agents

P20.30-0202-01
