Mercedes AMG Multi-Piece, Style I Wheels - \$700

image 1 of 11

Authentic Mercedes BBS AMG Style I 2 piece wheels

Specs:

Bolt pattern: 5x112

Wheel Size: 7.5J x 17

Offset: ET 42

Tire Size: 225/45R 17(recommended)

Preface: I do not have to sell these wheels. Please, serious buyers only. NO TRADES. Thank you in advance.

As the title states, I am selling my Authentic Mercedes BBS AMG Style I 2 piece wheels. I purchased these wheels a few years back and they weren't in the best condition. The pervious owner thought it would be a great idea to smooth the faces of these rare wheels. He attempted on one of them and was unsuccessful and he did not want them anymore, which is where I come in. I purchased these wheels for my 1999 Audi A4 1.8T quattro. I won't say how I was going to have them refinished until I speak with

my 1999 Audi A4 1.8t quattro. I wasn't sure how I was going to have them refinished until I spoke with a gentleman at Forgeline Wheels in Dayton, OH. After thinking long and hard about it, I decided there was only one way to make these wheels look uniform and really stand out. I know the purist will want to scream, but remember, I didn't have a choice. My only option was to have the //AMG logo filled in and smoothed. I had Forgeline do this for me and they did an excellent job. Not only did they correct the issue and make the wheels look phenomenal, they also polished the lips of the barrels that turned out great as well.

I have been trying to locate a set of these wheels, but I could not seem to find them. I decided to call my local Mercedes Benz of Cincinnati. After some digging by the parts manager and matching the part numbers to an AMG, we found the wheel and name. That being AMG, Multi-Piece, Style 1. When I asked him (Tyler) why I couldn't find these wheels anywhere, he informed me that these wheels came from an AMG late 1980's early 1990's. Not only did he say that, but he also mentioned that these wheels were not on any AMG cars sold in the US, you could only get them in Germany and even in Germany there weren't many AMG's that had these particular wheels on them. I asked what the price of a set of these wheels would be. He informed me that these wheels can still be purchased, however, they can only be ordered directly from Germany and the price per wheel is \$1,700. That being said, the price that I am asking, I believe is fair.

The wheels are in good shape. They have been off of the car for a while, because I sold the car a while ago. I do have tires on them, but they are in bad shape.

What you get with the wheels:

Ball seat bolts

Matching Affalterbach Center Caps/valve stem caps

Hub centric rings for direct bolt onto Audi

Price: \$700

condition: **good**

make / manufacturer: **AMG**
