Item specifics

Part Brand: Assemmacher Special tools.

Seller's description

Up for Auction is a Group of 3 different Assemmacher Special Tools Test Software Systems, One Series 5700 Retriever Main Handheld Unit, One AST Multiplexer Revision "300," that fits into the OBD2 socket in the car, and One AST M4040 Adapter, and the wiring adapters to connect the M4040 to the hand held tester. Also included is the adapter used to connect the Handheld unit to the earlier Audi and Volkswagen test points in side of the automobile. The First Test system is an AST - Mercedes Test Cartridge # 5724 F, Revision 4.62, which I believe is the newest-last release for Mercedes Benz Autos. It comes with the Factory Instruction Booklet that describes how to use the Hand held unit, and the Step By Step examples of Fault Finding [and Data], and Clearing, Live Data for Engine, Transmission, and Chassis, Adaption of engine, transmission, and chassis systems, AAM coding information, Roadster Soft top live data, Resetting of the Brake Lining Wear Indicator, and countless other Information and Functions. It provides Engine, transmission, Climate Control, Air suspension, Chassis, and all interior live data when the auto supports it. This Cartridge supports the 190, 124, 129, 140, 163, 168, 170, 202, 203, 208, 210, 215, 220 Autos, and also works on later M.B.cars with similar systems. If the auto has a system that has readable real-time and fault information available this Cartridge will probably read it. The Next Software System is the VW/Audi system with the 5721-7.18E, Revision 7.18 Cartridge and It comes with the Factory Instruction Booklet. This Is Also which I believe, is the Newest-Last Release for the VW-Audi autos. It performs

the same functions as the Mercedes Cartridge for the VW-Audi autos where the systems have feedback abilities. The Third Software System is the Mercedes Benz Cartridge # 5724 which is used for Mercedes cars with Analog-Impulse systems which have 8 pin, 16 pin, or 38 pin connectors under the hood. It will work on the older autos where the systems have feedback abilities. All of the Equipment is in Very Good Used Condition. The Hand Held screen is bright and all of the Cartridges light up when plugged into the hand held. They were in daily use in a shop until the owner retired, and I was told that they all function properly. Please look at the pictures, as this is what you will receive. All sales are final, with no returns. If you are interested in other MERCEDES or BMW test equipment please look at my other auctions. Thanks.
