

ww-6/140

Engine Support / Mount

ISO9001 : 2008 | Made in Eichstätt / Germany

Usable with ww-250, ww-MG-500 and ww-MG-600/V
Time-saving and safe mounting
Good accessibility of engines and transmissions
Suitable especially for Mercedes, Porsche, VW and Audi

Applicable in all automobile workshops. For repairing all engines in combination with repair stands ww-250, ww-MG-500 and ww-MG-600/V. Lifting lugs are mounted to support flange by means of hexagon screws M14. Suspension bolts are screwed in engine or transmission. Subsequently the unit is adjusted to the support lugs and bolted together (hexagon screws M12). Max. load capacity is 500 kg.
